Worked as an internee with Software Development team of HIST, Learned Open source Technologies, Developed Websites. Database optimization.

Major Projects

Project name: eZanga**Duration: 8 months**

Description: eZanga offers pay per click advertising to an audience that is not typically reached by the major search engines. If you already advertise with the major search engines and need more traffic or want a lower cost per click, then eZanga PPCTM is the perfect choice. eZanga can offer you effectual and targeted results and provide you with the widest reach including full reporting and campaign management options .

Technologies:Laravel5 , ORM- Doctrine, Centos6.6, Ngnix

Project name: Queue Based Processing (Daemons: A Background Services)**Duration:** 2 months

Description: The Queue module provides a FIFO implementation suitable for multi-threaded programming. It can be used to pass messages or other data between producer and consumer threads safely. Locking is handled for the caller, so it is simple to have as many threads as you want working with the same Queue instance. A Queue's size (number of elements) may be restricted to throttle memory usage or processing. Queued processing offers the following advantages over real-time processing:

- Reduced dependency on component availability
- Shorter component lifetimes
- Uninterrupted productivity when using disconnected applications
- Message reliability
- Efficient server scheduling

Technologies: Custom PHP Framework, JavaScript, PDO,Cenots ,File Management

Role and Responsibility: Worked as a developer in a distributed team.Created Daemons to handle multiple queues and pools . File handling and creating temporary directory **dev/shm** .Worked with distributed team .

PS : Can provide whole documentation on Queue based processing

Project name: Love That Fit, <http://dev.lovethatfit.com/>, <http://lovethatfit.com/>

Duration: 6 months

Description: LTF is a virtual fit technology that retailers and brands license. Our tool allows their customers to see actual look, fit and size of clothing on themselves. Works with any Smartphone, tablet or computer.

Technologies: Symfony2, JavaScript, MySQL, ORM,

Role and Responsibility: Worked as a developer in a distributed team. Worked on the server side of the system.

Project name: Job App <http://www.bestjobapp.com/>

Duration: 2 months

Description: A job recruit web, where user can post job , recruiters can hire employees, Its facebook app, User can login from facebook too.

Technologies: CodeIgniter, Facebook Lib, & MySQL.

Role and Responsibility: Worked solo.

Project name: Gotham Cycles, <http://www.gothamcycles.com/>

Duration: 2 months

Description: A shopping cart that sells auto bikes parts etc. With different payment gateways and shipping api

Technologies: PHP & MySQLi.

Role and Responsibility: Worked as a developer in distributed team. My role was to fix bugs as well as adding new features to the product.

Project name: CMS Katrina Write, <http://www.katrinawrites.com/>

Duration:

Description This website offer the freelancing content writing .

Technologies: CMS-Wordpress.

Role and Responsibility: Developed this content writing site .

Academic Qualification

BS in Computer Science from University Of Sindh Jamshoro

(1st Division 70.04% (3.34 CGPA))

Highlights

- Oracle 9i
- Data Structure and Algorithms
- System Analysis & Design
- Software Engineering
- Data Base Management System
- Programming Techniques
- Computer Graphics
- Visual Basic
- Object Oriented Technique.
- Network Environment.
- Business Management.
- Software Environment.

Personal Information

Email: skamrani2002@gmail.com

Date of Birth: 25th March 1987

Marital Status: Single

Address: Near Fatima Dental College DHA Phase1, Karachi # 75460, Pakistan

Contact #: 00-92-3312783181
